Introduction

Sustainable development is the overarching paradigm of the United Nations. The concept of sustainable development was described by the 1987 Bruntland Commission Report as “development that meets the needs of the present without compromising the ability of future generations to meet their own needs.” The concept of sustainability is composed of three pillars: economic, environmental, and social—also known informally as profits, planet, and people.

أهداف التنمية
المستدامة البحرين
BAHRAIN SDGs 2030

11 SUSTAINABLE CITIES AND COMMUNITIES

from Goal 11 (Sustainable Cities and Communities), I chose the issue of culture and heritage.

Culture and heritage:
Heritage is an essential part of the national identity; It is a physical and moral embodiment of it, and it contributes to strengthening the link between the present, the past and the future, and helps the continuity of societies.

Bahrain is interested in most of the heritage sites and archaeological sites, but there are some sites that must be seen and taken care of and inform people about them, care and constant attention to these sites and their definition attract tourists from home and abroad and also know the importance of these sites and contribute to increasing their awareness of their importance and awareness among citizens and tourists encourages them To preserve it and not to harm it and sabotage it, which negatively affects the achievement of this goal by preserving heritage.

in this project the target group is the entire Bahraini society, because to achieve the goal, the heritage and archeology must be preserved from vandalism and damage, and this needs awareness.

In order to achieve Goal 11, heritage and antiquities must be preserved and preserved from damage and vandalism, and as efforts by the Kingdom of Bahrain to achieve this goal and issue, the Authority for Culture and Antiquities has established a goal of preserving Bahraini heritage and introducing it to spreading culture and awareness towards the heritage and antiquities. Also, preserving Bahraini heritage and introducing it brings economic benefits such as attracting tourists, stimulating tourism and visiting internally, externally and socially.

Methodology

In line with the goals of the Culture and Antiquities Authority that it seeks to achieve the goal (11 sustainable cities and communities), and as a sustainable solution I will create an application to introduce people to Bahraini heritage and monuments.

Where all the archaeological sites in Bahrain will be included and displayed in the application and people will be introduced to them, as each heritage site will be included in this site and information about it, and its location will also be included on Google Maps.

Application Bahrain heritage site ..

Fig 1 : the application interface

Fig 2 : An exhibition of Bahrain's heritage and archaeological sites in Arabic

Fig 2 : An exhibition of Bahrain's heritage and archaeological sites in English

Fig 4 : A page contains pictures of the archaeological site, information about it and its location in Arabic .

Fig 5 : A page contains pictures of the archaeological site, information about it and its location in English .

This is a simple idea about a site whose goal is to introduce people, tourists and those interested in heritage and history to heritage and archeological sites in the Kingdom of Bahrain.

Conclusions

These solutions will increase the culture of people and society by being the target segment and their knowledge of heritage and archeological sites, as an achievement of the goal of the Bahrain Culture Authority, the monuments concerned with the interest in the Bahraini heritage. Thus increasing their awareness towards these sites and their importance to the homeland and the citizen.

The Culture and Heritage Authority aims to protect, promote and define the national cultural identity as a component of civilized identity. The authority seeks to make culture a pillar of economic and social development and enhance Bahrain's reputation as a culturally neutral country.

Also, taking care of the heritage sites, revitalizing them and introducing them contributes to the recovery of domestic and foreign tourism, which improves the economy.

One of the goals of sustainable development regarding heritage and antiquities is to protect and preserve them as a national identity, it is important to publicize them and their importance to avoid sabotage and tampering with them in order to achieve the goal.
